A NEW BUILDING ■ A NEW MBA ■ A NEW DEAN

The Miracles of 6710

A NEW BUILDING, A NEW MBA,

By Don Argue, Ed.D
PRESIDENT

This past fall, the fall of 2002, we had a problem. Growth at the college was so strong, we had run out of room. There wasn't an empty classroom or office anywhere on campus.

The "space crunch" was particularly acute in what we called our LEAP program – Leadership Education for Adult Professionals.

This is the program that makes it possible for working adult professionals to earn a B.A. Degree by attending classes on evenings and weekends.

In addition, our first graduate program – the Master of Arts in Counseling Psychology – was attracting new students.

And there were new degrees in the works, both B.A. and M.A.

The First "Surprise of Jesus"

You may know that I like to

talk about the Surprises of Jesus. Well, there was a big one right down the street!

Just a few blocks north of our campus, right on 108th Ave. NE, there is a Starbucks, which is visited regularly by our students, faculty and staff.

Across from this Starbucks is a new office building, erected at the height of the dot.com bubble.

But that bubble has burst, and there was a sign outside this building announcing that office space was available for rent.

One day our Vice President for Advancement, **Dan Neary**, saw the sign, and got an idea: "Maybe we could rent some space in this building as a short-term solution to our space crunch, until we construct our new Academic Center."

He called the leasing agent. We thought that some space would be available. It turns out that *all* the space was available.

The major tenant, *Captura*, an international software firm, had been acquired by a competitor, *Concur Technologies*, which consolidated operations and vacated the space in Kirkland.

As a result, the owner of the

building couldn't make the mortgage payments, and the building had gone back to the bank.

The Lord seemed to give us a shot of faith, and we started to ask ourselves, "Rather than rent some space, should we try to purchase the entire building?"

It seemed outrageous at first. But it quickly began to make sense.

The building was priced significantly below what it cost to construct in 2000, and was of top quality. It was clearly a short-term solution to our need for space, and it also seemed to be an excellent longer-term investment.

We consulted our board, and they said, "Go for it!"

So members of our team rolled up their sleeves and got to work.

Lots of people deserve credit, including Dan Neary, who I've mentioned, **Dan Schimelpfenig**, our VP for Administrative Services, and **Steve Sankey**, our Director for Campus Planning and Construction.

We received vital input from **George Reece**, a real estate developer who is on our board. We can't thank him enough for

his professional guidance.

We gave the bank a "lowball" offer – and they accepted it!

In December of 2002, the former Lakeview Office Building, 6710 108th Ave.

NE, became the Center for Graduate and Professional Programs at Northwest College!

It is 35,000 square feet of premium office space on 1.5 acres, less than half a mile from our main campus.

The first floor contains offices for recruiting coordinators for the LEAP and graduate programs.

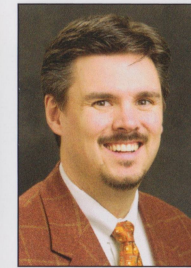

The second floor contains offices and classrooms for LEAP and our graduate programs.

And the third floor contains administrative offices and conference facilities.

In the physical sense, we were root-bound. This building has relieved the pressure on our main campus, and it will provide room for expansion of our fastest growing programs!

The Second "Surprise of Jesus"

On Feb. 28 we received a letter from the Commission on Colleges and Universities indicating that a Master of Business Administration Degree (MBA) is now included under our current accreditation status.

Perhaps this really shouldn't be categorized as a surprise, since we had already received accreditation for our Master of Arts in Counseling Psychology.

But the timing was a pleasant surprise.

This new degree is designed to prepare students for effective leadership in the 21st century. Students will be equipped with the technical and managerial skills to perform with competence. Students also will be chal-

Administrative and faculty offices are already in use, and classes are beginning to meet at 6710, including this M.A. class with Dr. Bill Herkelrath.

NEW APARTMENTS – Nearing Completion

Four new apartment buildings, containing a total of 32 apartments, are nearing completion. They are just east of the existing "Firs" Apartments.

A NEW DEAN... AND THE RETURN OF TWO OLD FRIENDS!

appointed Dr. Self to serve on the Citizen's Commission on Salaries for Elected Officials. During the 2000 presidential election, Dr. Self was a member of the High Technology

Committee for George W. Bush.

He recently served as Professor of Business Management and Interim Dean for the Center for Adult Leadership Studies at Northwest College.

He and his wife Carol have two adult sons, Eric and Adam, who is married to our Director of Alumni and Public Relations, Tiffany Self.

Welcome back, Woody!

Another Old Friend Returns

We also are welcoming the return of **Jeff Lockhart**, as the Director of our Capital Campaign.

Jeff graduated from Northwest College in 1989, and served as a Youth Pastor at First Assembly of God in Centralia, Westminster Assembly in Seattle, and Valley Life Center in Dallas, Ore. He then served as Senior High Pastor at Life Center in Tacoma, Wash.

From 1996 to 1999 he served as Director of College Relations at Northwest College.

For the past few years, Jeff has managed a local branch office for a leading national brokerage firm.

His background in ministry and financial matters gives him the expertise and experience in this vital area. Welcome back, Jeff!

Opportunities = Hard Work

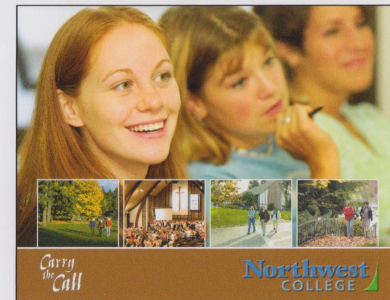

With the clear blessings of God evidenced in the new building at 6710 and in our growing number of academic programs, there is plenty of new work at hand.

There are fund-raising needs, which Jeff Lockhart will help address, working with Dan Neary and Joni Welk Campbell, our Director for Development.

The pressure is also on over on the recruiting side.

Our Associate Vice President for Enrollment Services, **Myles Corrigan**, heads up an expanded team of recruiters for traditional students, as well as for our adult programs and our two graduate programs.

Keep these people in your prayers – they have a big job!

lenged to think and grow as people of character and vision, so they'll be able to lead with compassion, courage, and integrity.

Classes for our new MBA will begin this fall.

By the way, our Master of Arts in Counseling Psychology is going well, under the leadership of **Dr. Bill Herkelrath**. At commencement activities in May, the first graduates of this program will receive the first-ever M.A. degrees from Northwest College.

The Third "Surprise of Jesus"

With the go-ahead on our new MBA, and with the resignation of Dr. Dan Anglin as the Dean of our adult degree-completion program, we needed a strong leader to come on board at 6710.

It turns out that this new Dean is an old friend of the college: **Dr. E. Arthur "Woody" Self**.

Dr. Self has 27 years of experience in higher education and in business. He has held positions in community colleges and doctoral degree-granting institutions, and he has been the president of two institutions of higher learning: Malone College in Canton, Ohio, and Seattle Pacific University in Seattle, Wash.

Norma Greeley-Reece Nicole Russell Lorna Greeley Jeanell Reece-Russell

The opportunity to name the Enrollment Center was claimed by George Reece, who made a donation in honor of the 50th birthday of his wife, Norma Greeley-Reece. Northwest College is a tradition for Norma, who is a graduate. Her mother, Lorna Greeley, attended (as did her aunt). Her daughter, Jeanell Reece-Russell is currently attending, and her granddaughter, Nicole Russell, is in line for the class of 2020!

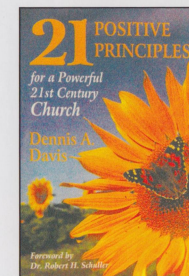

We Rely on Your Referrals

Alumni and friends of Northwest College play a definite role in helping potential students find out if this is the place where God wants them to prepare.

If you'd like a copy of our latest View Book, to help in your efforts to represent your college, we'd be glad to send one (or two or three) to you. Just call 800.669.3781.

Former Northwest President Publishes Book on the Church

Dennis A. Davis, a graduate of Northwest and its third president, recently wrote a book entitled *21 Positive Principles for a Powerful 21st Century Church*.

Every pastor should read this book – it's full of practical help!

It is available on the internet through *Amazon.com* and at *Barnes & Noble*.

FACULTY FOCUS: BILL & JACQUI

Bill and Jacqui outside Perk's Lounge, where he asked "Miss Vaughn" for their very first date.

"In those days, you had to keep a space between you that was the size of a Bible," recalls Bill. "Needless to say, *Thinline* Bibles were very popular. Eventually, I got the entire New Testament on a 35mm slide. You had to read it with a microscope, but it fit in my shirt pocket!"

When Bill Randolph came to Northwest, he fell in love. Twice.

He fell in love with the college, and then he fell in love with a student. And the second was more intentional than the first.

Because he didn't intend to come to Northwest College at all.

"My mom loaded me up with a friend who was coming to Northwest. They didn't even know I was coming," recalls Bill.

"This was the last year that the college was located at the old Hollywood Temple (since renamed Calvary Temple), and they had no men's residence halls. There was a lot of running around trying to find a place for me to live."

But he quickly fell in love with Northwest College.

"I was just a country boy with no real idea about college," he says. "I actually feel like I learned what it means to be a Christian by observing those around me."

Bill wanted to become a music evangelist. He sang and travelled with the concert choir, and he also joined a quartet.

The brother of a member of the quartet was dating a student

who had a younger sister... (you can see where this is heading).

"I knew of the family," states Bill. "And I heard the sister was coming to Northwest College. I planned for months – I wanted to be the first one to ask her out."

But in the meantime, there was work to be done.

Bill was a student when the miracles occurred that made it possible to acquire the college's current campus in Kirkland.

But his memories are of more than miracles – his memories are of hard, painful labor.

"During my freshman year, we had Student Work Days on the site of the new campus," Bill says. "For some of us, that consisted of clearing blackberry briars."

The summer was better.

"I sang first tenor in a quartet that spent 12 weeks in Hawaii," states Bill.

"When I came back to Northwest College in the fall, I felt I had a little fame – or notoriety – and I hoped that would put me in good standing when I met that younger sister."

Lipstick on wedding portrait was added by hand colorist.

Let him eat cake – the classic photo at their wedding on June 29, 1962.

With daughter Teresa in 1980. They also have a son, Jeff.

A surprising sense of style.

Always quick to adapt the latest technology.

RANDOLPH

The younger sister was growing up on a farm in eastern Washington, the third of five girls.

But she didn't have to arrive at Northwest College before she fell in love with the place.

"Northwest College was just it," she recalls. "We had all the music groups from the college visit our church, and I got all their records.

"One of the quartets consisted of Rollin Carlson, Gene Ness, Al Baungard, and Ken Lindgren... and I can still sing their songs!"

She arrived on campus and was invited to the practice of a certain quartet.

"After practice, I walked her back to the women's residence hall," remembers Bill. "There was going to be a big bonfire at a neighborhood church, and I was going to ask her to go with me.

"But when we got to the door outside Perk's, I forgot her first name. So I asked 'Miss Vaughn' if she'd like to go."

Miss Vaughn – Jacqui – didn't really know what to think.

"I was new to the big city," she remembers. "Maybe this is just what they did!"

More than 40 years have gone by, and Bill is still in love. With Northwest. And with Jacqui.

They have spent a lifetime as teachers: at Northwest and all over the world, from Fiji to Africa to Romania and Vanuatu.

The names many of us know from buildings, they know as persons: Crowder, Pecota, Fee, Rice, Butterfield.

It hasn't always been easy: "Every summer for 25 years, we drove farm machinery at Jacqui's dad's farm to support our teaching habit at Northwest College."

But it's always been worth it.

"I wanted to teach here because of what Northwest College did for me," says Bill. "And what it did for me, I wanted it to do for others."

The campus has changed, but the students, in one important respect, have not.

"I see the same intense desire to know and serve God," states Bill. "It's still there."

"With perhaps more openness than in our day," adds Jacqui.

"It's been sheer pleasure," says Bill. "There's no other way to describe it."
