ON-CAMPUS STUDENTS

When the Administration was faced with the purchase of new and more washers and dryers, investigation was made as to the advisability of going to a commercial vending operation or continue with our own management. A vending company offered to furnish and maintain all machines at a cost to the student of \$.25 per load for washing and \$.25 for drying. It was determined that by charging \$.20 per washing and \$.10 for drying we could continue our own operation, purchase and maintain the machines and still effect a savings for students.
