I. DESCRIPTION OF EMERGENCY POLICY

This section of the Policy and Procedure Manual contains the policies that the College holds in regards to emergencies. All persons should be familiar with these policies and where their role fits in.

A. Purpose

The basic emergency procedures outlined in this guide are to enhance the protection of lives and property through effective use of College and community resources. Whenever an emergency affecting the campus reaches proportions that cannot be handled through routine measures, the President, or his designate may declare a state of emergency, and these contingency guidelines may be implemented. There are two general types of emergencies that may result in the implementation of this plan. These are:

1. Large-scale disorder
2. Large-scale natural/man-made disaster.

Since an emergency may be sudden and without warning, these procedures are designed to be flexible in order to accommodate contingencies of various types and magnitudes.

B. Scope

These procedures apply to all personnel, buildings and grounds, of Northwest College to include those peripheral areas adjoining the College

C. Types of Emergencies

Types of emergencies covered by this manual include the following:

1. Fire
2. Earthquake
3. Explosion on campus
4. Bomb threat
5. Civil disturbances and demonstrations
6. Utility failure
7. Violent or criminal behavior
8. Medical and first aid
9. Media relations
10. Psychological cases

In addition information included, regards the following:

1. How to report all Emergencies.
2. Evacuation procedures
3. First Aid Instructions

D. Definitions of An Emergency

The College President or his designate serves as the overall Emergency Director during any major emergency or disaster. The following definitions of an emergency are provided as guidelines to assist building and area coordinators in determining the appropriate response:

1. **Minor Emergency:** Any incident, potential or actual, which will not seriously affect the overall functional capacity of the College. Report incidents immediately to Security at ext. 5500 or 222, off campus dial (206) 755-3249.
2. **Major Emergency:** Any incident, potential or actual, which affects an entire building, or buildings, and will disrupt the overall operations of the College. Outside emergency services will probably be required, as well as major efforts from campus support services. Major policy considerations and decisions will usually be required from the College administration during times of crisis. Report

incident to Security.

3. **Disaster:** Any event or occurrence which has taken place and has seriously impaired or halted the operations of the College. In some cases mass personnel casualties and severe property damage may be sustained. A coordinated effort of all campus-wide resources is required to effectively control the situation. Outside emergency services will be essential. In all cases of disaster, an Emergency Control Center will be activated, and the appropriate support and operational plans will be executed.

In addition, any incident which has the potential for adverse publicity concerning campus resources should be promptly reported to the Vice President for Administrative Services, Vice President for Student Development, and Security Supervisor.

E. Assumptions

The College Emergency Contingency Plan is predicated on a realistic approach to the problems likely to be encountered on campus during a major emergency or disaster. Hence, the following are general guidelines:

1. An emergency or a disaster may occur at anytime of the day or night, weekend or holiday, with little or no warning.
2. The succession of events in an emergency are not predictable, hence published support and operational plans may require field modification in order to meet the requirements of the emergency.
3. Disasters may affect residents in the geographical location of the College, therefore City, County and Federal emergency services may be expected.
4. A major emergency may be declared if information indicates that such a condition is developing or is probable.

F. Declaration of Campus State of Emergency

The authority to declare a campus state of emergency rests with the College President his designate or representative as follows:

During the period of any campus major emergency the Security Department, as required, shall place into immediate effect the appropriate procedures necessary in order to meet the emergency (safeguard persons and property, and maintain educational facilities). The Plant Manager and Security Supervisor shall immediately consult with the President or his designate regarding the emergency and the possible need for a declaration of a campus state of emergency.

When this declaration is made, only registered students, faculty, staff and affiliates; i.e. persons required by employment, are authorized to be present on campus. Those who cannot present proper identification (registration or identification card, or other I.D.) showing their legitimate business on campus, will be asked to leave the campus. In addition, only those faculty and staff members who have been assigned emergency resource team duties or issued an emergency pass by Campus Security, will be allowed to enter the immediate disaster site. In the event of fires, storms or major disasters that occur on the campus or involve College property, Security Officers will be dispatched to determine the extent of any damage to College property.

G. Emergency Closure Notification Procedures.

In case of a power outage which occurs outside of the normal work hours (Mon.-Fri. 8a-5p) it is important that you immediately make contact with personnel from the Information Services Office. The names of the people to contact are in the policy and procedure manual of Security.

A. If a power outage occurs anywhere on campus, call them **immediately**, attempting to reach them in the order indicated. It is **imperative** they be called as soon as possible, since some of the equipment is on battery backup, with a backup time of 15 minutes or less. If the equipment loses power we may lose valuable data.

B. If you see some other situation concerning phone equipment, try the phone technician first, then the computer technician, then the Information Services Supervisor.

C. If you are leaving a message on voice mail, simply leave it on the voice mail of the first person notified. If you call them at home, please try each of them in the specified order until you, hopefully, contact someone.

D. If you are calling them at home and do not get an answer, please **DO** always leave a message, giving the time and problem. Try once more, in case the person in question was just asleep, etc. On the second call, please again leave a message, saying that you are now going to try calling the next person on the list, saying who you will call next, and then leave a number of where you can be reached. If you have not reached anyone by the time you call the Information Services Supervisor for the second time, then drop the matter.
